Summary

With solid portfolio of Senior UI Designer at Alinma Bank, based in Saudi Arabia, and with more than six years of experience, I believe that my professional experience and educational and training background make me one of the most qualified candidates for this position.

My career history started in 2010. I started as a freelancer, after that I joined a Cairo-based company for web solutions as a Junior web designer working on the clients' projects. Today, I am proficient in various types of designing work; including: Mobile Apps, Website Templates and a lot of Graphic Design tracks.

I had the opportunity to be involved in different types of projects; in the field of education, media, real estate, e-commerce, corporate profiles and individuals' portfolios. Also, I worked with different types of companies; both corporates and startups. You can check a summary of my portfolio through this link: <http://www.be.net/aali>

I am capable of working in a team and managing the delivery of projects in the best way. Furthermore, I excel at:

UI Design (colors, typography, white space),
Graphic Design (Photoshop & Illustrator)
Prototyping (Invisionapp, Marvel App and Uxpin),
Wireframing (Balsamiq - Illustrator - Office tools),
Web Design (Responsive web design, Front end development, Wordpress),
Mobile Apps Design (Photoshop, Illustrator, Sketch & Figma).

Lately, I have been searching for a new challenge in a new field for me. I am prepared to become an active team member who can add positive contributions to your organization.
